Title:

Comments: Keep roads out of the Tongass National Forest! Please!

Please choose the "No Action" alternative on the Alaska-specific Roadless Rule! Do not allow roads to ruin wildlife habitat and exacerbate climate change by destroying trees in the Tongass National Forest! We need all of the rainforests we can preserve; by dissecting the Tongass National Forest with roads, we would endanger the future of our own species by releasing more currently-trapped carbon into the atmosphere, as well as immediately endangering the survival of the wildlife - such as Northern Goshawks! - who need that undisturbed temperate rainforest to live in. Do not destroy the Tongass National Forest. Please. Keep the Roadless Rule in place by choosing "No Action."

Thank you for your time, and, I hope, your continued protection of American forests and the future survival of many species (including ours).

Sincerely,

Kathryn Dorn
