Comments: Support Alternative # 1 and oppose Alternative #6

As a long time resident in the Tongass National Forest, having seen the massive negative impacts and minimal economic gains for the USA, the USFS, the State of Alaska, or it's residents, I plea for the No Action alternative.

Today I received a poll from Rep. Don Young's office[hellip]of the options for Congressional priorities listed, resource development scored last. This a poll disributed to people who have been in contact with the Republican representative's office.

Further timber harvesting and exporting our forest products to overseas interests is short sighted and mocks the duty to protect this forest.

Sincerely,

David Palmer

Anacortes, WA 98221
