Comments: Roadless rules, choose alternative 1

I am writing to express my opposition to the selection of Alternative 6 as the preferred alternative for the management of roadless areas within the state and specifically in the Tongass National Forest. The forest is an ancient treasure of inestimable worth just as it is! Building roads and logging in this forest will destroy the forest, lands, and waters of an area that has, thus far, escaped much of the decimation seen in the lower 48.

It is clear that Alternative 1 is the preferred alternative, change course now!
