Comments: Option number 1 for Tongass National Forest

To whom it may concern,

There is absolutely no reason that in 2020 with a very apparent climate disaster at our heels that we should be opening up the largest old growth rainforest in the US to resource exploitation.

I support alternative number 1, no action, in moving forward.

Please consider the future. This development is extremely short sighted and will only benefit the extreme wealthy at the top in the long run and will leave us all with dirty water, smoggy skies and a hellscape dystopia. This decision will affect generations to come and you will be responsible.

Thanks for your consideration and please do NOT develop the Tongass.
