First name: dennis

Last name: Begner

Organization:

Title:

Comments: As a native Georgian, the forest areas you manage were set aside for us the people and to preserve their future as a sacred trust. A sacred trust is kept by allowing the constituents to be informed and acting on their behalf.

I see the vile attempt being made now to subvert public input (making decisions without public forums and participation) and it appears greedily allowing more Roads, timbering, sprays, and commercial profit making use at the expense of preservation. I and my friends are appalled! We intend to fight and oppose vigorously. This new organization is moving away from transparency into some shady back room decision making. (if its not shady, show the public as currently mandated) I (and we the public) urge you to do the job you were hired and elected to (as stewards of the forests) keep an open forum and allow the people to know and be involved.
