Comments: We, as citizens of this great nation, have always appreciated our right to determine the uses of our publicly held resources. It is only by reviewing each proposal item-by-item, location-by-location, and step-by-step over an adequately lengthy review schedule that we can make proper decisions.

The subject proposal documents are void of many of these needed criteria to vote in an informed and correct manner. Please consider what I have suggested as your review and rewrite any of the Chattahoochee Forest uses and permits.
