Comments: I respectfully request that the Forest Service withdraw the recommended pipeline project.

The Forest Service failed to consider an alternative that doesn't require exempting Jordan Cove from adhering to their forest plans. Late Successional and Riparian Reserves should not be stripped of protections at the behest of a

foreign fossil fuel company. The Forest Service did not consider site-specific impacts that pipeline construction would have and must disclose impacts and plans for mitigation on a site-specific basis. The pipeline plan undermines the Forest Service's "survey-manage" protocol, created to ensure the protection of federally protected endangered species. The Forest Service did not analyze or mitigate for increased fire risk from the LNG pipeline. The cumulative effects of this proposal on watershed, wildlife, and fire management have not been analyzed for their comprehensive "purpose and the effects" as required by law. The proposal fails to meet requirements of the Aquatic Conservation Strategy and should not be exempt from analysis and mitigation of landslides, sedimentation and waterway degradation.
