Comments: I oppose the Forest Service proposal to throw out the rules for Pembina/Jordan Cove LNG. I live in Jackson County, Oregon in an area impacted by the Forest Service inability to follow the rules for this pipeline. The rules were made to protect me as a U.S. citizen and not allow foreign (or any company) to ignore the rules for their benefit. The Forest Service should follow the rules and fairly evaluate the environmental damage that will be done by this pipeline & violating my safety, degrading the water (with NO oversight or ability to correct), increasing the fire danger. If the Forest Service maintains the existing rules and follows them - there can be only 1 conclusion: DENY Pembina the ability to create the LNG pipeline and the Jordan Cove refinery.
