Comments: Hello! We seem to be SORELY underserved as it relates to single track, ONE WAY ONLY 2 wheel only trails. I strongly feel that the 2 way trails are a danger and a deterrent to many from availing themselves of the opportunity to ride public land.

No insurers would write a policy for a private park with 2 way trails. I've seen many single track systems on Federal land out west so I know it is possible. Please consider opening this up to more bikes and less so to the quad and side by side crowd and you will see LESS damage and more thoughtful stewardship.

Thank you
