Comments: In this current situation where we are concerned about the Carbon footprints of us all, and deforestation of the earth, why are we cutting down forest and increasing the carbon emissions of the foothills? I am apposed to any project that destroyes any amount of acreage in the Chattahoochee service area. We cannot afford to allow this area to be developed, ruining the land. The ONLY people to benift from this are corporations that deliver little if any benefit to the people of this community.
