U.S. Forest Service Alaska Roadless Rule Committee:

You would not believe the beauty of this area! Please, allow me and others to show you this amazing piece of our natural world which is currently left in a healthy natural state. I know without a doubt you too will want to preserve this in its natural state for generations to come! Please reconsider extractions in this area.

Please.

The Roadless Rule has been instrumental in conserving the Tongass National Forest and in supporting its fish and wildlife-based industries for almost 20 years. Please uphold the Rule's protections for important fish and wildlife areas, including the Tongass 77. Roadless areas are an important source of food, jobs, and income through commercial, subsistence, and recreational fishing. Salmon are part of Alaska's culture and we must protect them and their spawning streams. Please do not roll back roadless area protections for habitat that our irreplaceable fish and wildlife populations need to survive.

Sincerely,

JAMES ROWLAND
