First name: Evelyn

Last name: D'Amico

Organization:

Title:

Comments: HC5017

My thoughts immediately went to the animals' habitats, and how their lives would be risked. Species would quickly die off, and the food chain and our own lives would be affected dramatically. I, Evelyn D'Amico, firmly set my foot down, with my goal to keep this amazing land in place, and keep our resources as they are. It would avoid costly damage. Instead, wind or solar power would work much more leniently.
