Comments: Good Afternoon,

I'm contacting the USFS today to express my opposition to the Blackwater proposal and the "conditioned based management". Without a specific, precise, and organized plan for this proposed area, I cannot support such ideas for slag roads, logging of timber, and further destruction of our local forests. Please reconsider this proposal for the benefit of our current and future generations who will see that the forests most always take care of themselves.

Respectfully Submitted,
Todd Burton
