Comments: I am concerned that the approach for the Foothills Landscape Project lacks the transparency and public input that has been the hallmark of successful Forest Service management programs. Please modify this project to include requirements to identify the specific places you intend to cut trees, apply herbicides, and light fires in the formal project review; that the review process publishes plans to the public and enables public input prior to going forward. We citizens are not trying to do your job and respect that the Forest Service has many highly qualified individuals in your employ. However, we all share in the use of these lands and want to ensure that the needs and concerns of all stakeholders are duly taken into account in your plans.

Thanks you for your consideration in this matter.
