Comments: To whom it may concern,

Here in the United States we have a long history of restricting our citizen from utilizing our beautiful nations natural resources. More often than not when access is restricted Americans being the liberty seeking pioneers that we are, find ways to get around these government barricades in frequently criminal/illegal ways. Stand with your fellow Americans and let's educate and find efficient ways of preventing overuse and disregard for our resources. Our liberties remain in tact, we don't create more criminals, more jobs will be created and since prevention methods and education are they key to any situations success. Our countries citizen awareness and concern will spread even further than it has already, helping us to secure a beautiful, peaceful and successful future for generations to come.

Let's quit cutting ourselves off and kicking ourselves out and instead rediscover our roots.

Regards,

Mike
