Comments: Stephanie Amack1220 Knight StDenton, TX 76205scamack@gmail.com11/30/2019The various grassland areas being considered for drilling need to be protected for citizens and not used for private/corporate profit. These lands were set aside for preservation of ecosystems and for respectful enjoyment; giving oil companies access to destroy these areas will result in irreparable harm. Once these lands are drilled into and destroyed, we will never get them back. I IMPLORE you to look at the long-term negative benefits this will have on Texas rather than the short-term benefits of MONEY - money that will only go into rich company's pockets while leaving Texas depleted and ravaged. Once these areas are GONE, we will NEVER get them back!
