Title:

Comments: I am heartbroken to learn of this proposal. Many of us in the area depends on our natural sources for day to day living, whether it's the water we drink or an herb picked from a trail we walk. We have a right to know and to protect our natural habitat and resources. It is wrong to ask me to standby with no say in actions that will affect my surroundings and their natural being including things such as my drinking water. I do NOT agree with this proposal for our area. I do NOT give up my rights to know and have say in these proposed actions.
