Comments: It is imperative that the United State citizens and visitors of foriegn lands have the right to recreation in the areas in which you are planning to ravage. Yes. Ravaged! The forrest should be maintained and the thinning is necessary, in sections at a time so that the integrity of the landscape can be maintained for all to enjoy. I do not agree with your proposal to take away the rights of visiting our forests for 20 years no matter what the reason

You are being unreasonable and selfish in the ways you have proposed to rape the land. It is our duty to protect and safeguard out lands which is greatly lacking in the methods you have chosen. Totally acceptable!
