Title:
Comments: There is not enough specific location information about this project. Part of the project states roadways could be closed, become administrative roads, or become seasonal roads without stating which roads will be effected. The public should be aware of what changes will be made prior to the start of any project concerning public land. The project also states there will be commercial logging and chemicals used but does not state what areas will be logged or have chemicals sprayed. I believe this project should be stopped until better information is provided to the public.
