Comments: As an avid outdoor enthusiast and a lifetime Georgia resident I am pleading with the Forest Service to give us more details about their plans and the future of the National Forrest and WMAs in our region. I understand that land management is vital - I am a farm owner and practice a variety of tasks each year in order to keep my land healthy and viable for future generations. But if the proper precautions are not taken then these sensitive areas like the Chattahoochee National Forrest could be lost forever. Please consider a more gentle approach and don't destroy what we have worked so hard to preserve until now. Thank you.
