Comments: There is not enough significant information in the proposal to allow for meaningful review and comment. In departure from previous similar projects, this one does not identify specifically where or generally when seriously impactful commercial logging, burning and chemical applications will occur.... only that the volumes within the area are quite large.

As a private citizen i could not support this project in the form currently presented and strongly urge the forest service to provide the public adequate and traditionally available detail to allow for informed decision regarding support or challenge to this project.

sincerely
