First name: William

Last name: Rodriguez

Organization:

Title:

Comments: I wholeheartedly believe that the proposed projects should be outlined in detail before approving this measure. We, as the public and local land owners, should be aware of the exact details of the projects in question, and how they affect our local region. As a local resident and land owner, I stand against approving this measure until the projects can be proposed in detail. This would enable the citizens of the region to make a logical decision about the management of our important region.

Sincerely,

William Rodriguez
