Comments: Being from WYOMING this does NOT surprise me but further shows the disregard many here feel towards "unwanted" animals considered "pests". This is 2019 and many of us have known for decades the need for ALL the animals on our lands as each has it's own function. I am NOT in favor of any slaughter and feel lucky I was made aware of this situation as many here in WY and the west have no idea what's happening in our name. NO - people do not want this slaughter and are sick to death of the cowboy "kill em all". WE ARE PRESENTLY IN AN EXTINCTION CRISIS - WE NEED THESE ANIMALS to do what they do for our grasslands. These lands belong to all of us, NOT JUST LIVESTOCK AND TIMBER! We feel strongly the industries presently using public resources have an obligation to take care of these lands for everybody, not just industries bottom lines. These animals are NOT in the way but are part of a greater eco system needing protection from those doing harm as the greater eco systems needs all it's parts to function correctly.

Thank you.
