Dear US Forest Service,

I support the ***No Action*** [in box] alternative, keeping the 2001 Roadless Rule in place as written to protect the Alaska's National Forests. The Forest Service must consider the importance of the these forests as a buffer against climate change, as well as how they provide for local tourism, recreation, and fishing.

Additional comments: I urge you to lead us toward a sustainable earth for human life by preserving the Tongass Nat'l Forest.
