ATTN: Alaska Roadless Rule [text underlined for emphasis] [text bolded for emphasis]

To Whom it May Concern:

I am writing this letter to register my concern regarding the various development options for the Tongass National Forest. I sincerely believe that the Tongass National Forest should have NO ACTION.

As inhabitants of this earth, we have a responsibility to protect it, preserve it, cherish it, and honor it. Alaska is one of the most beautiful areas on earth, and it is suffering, as is the rest of America, from human destruction for human profit. **There is no good reason** [Text italicized for emphasis] [text bolded for emphasis] to alter the Tongass National Forest in any way.

Please consider your jobs as stewards of Tongass. **Please protect it, keep it wild and beautiful** [Text italicized for emphasis]. With all that is currently going on the world regarding natural destruction (by fire, flood, winds/climate change); and human-made destruction (for example the proposed mining of the Grand Staircase Escalante National Park in Utah; burning of the Amazon rain forests) I fervently request that the United States Forest Service do the right thing and that is NO ACTION to alter or destroy any part of the Tongass National Forest.

Sincerely
