Dear U.S. Forest Service:

The Roadless Rule has been instrumental in conserving the Tongass National Forest and in supporting its fish and wildlife-based industries for more than 20 years. ***Please uphold the Rule's protections for important fish and wildlife areas, including the Tongass 77.*** [Text bolded for emphasis] roadless areas are an important source of food, jobs, and income through commercial , subsistence, and recreational fishing. Salmon are part of Alaska's culture and we must protect them and their spawning streams. ***Please do not roll back roadless are protection for habitat that our irreplaceable fish and wildlife populations need to survive.*** [Text bolded for emphasis]

Customize your comment by listing reasons the Tongass is important to you or why you value Alaska Roadless areas: (ex: specific locations you recreate, activities you do, or why you value fish & wildlife) [Text italicized] Essentially the existence, healthy existence of us (we humans) are strongly /heavily reliant on a healthy ecosystem. That is very general, but it truly does apply. I'm from a very small pacific island nation I dreamed of experiencing the beautiful majestic Alaska mountains since I was a kid. And, to see salmon with my own eyes, bears & moose! I love it here! I would like Alaska to remain environmentally healthy so others may continue to enjoy it as I have.

Sincerely,

Would you like to volunteer with TU Alaska to Help America's Salmon Forest?

Yes No
