Dear U.S. Forest Service:

The Roadless Rule has been instrumental in conserving the Tongass National Forest and in supporting its fish and wildlife-based industries for more than 20 years. **Please uphold the Rule's protections for important fish and wildlife areas, including the Tongass 77.** [Text bolded for emphasis] Roadless areas are an important source of food, jobs, and income through commercial, subsistence, and recreational fishing. Salmon are part of Alaska's culture and we must protect them and their spawning streams. **Please do not roll back roadless are protection for habitat that our irreplaceable fish and wildlife populations need to survive.** [Text bolded for emphasis]

Customize your comment by listing reasons the Tongass is important to you or why you value Alaska Roadless areas: (ex: specific locations you recreate, activities you do, or why you value fish & wildlife) [Text italicized]

Clearcutting what remains of the Tongass old growth Forest to sell [illegible] logs to China is a very bad idea. And very bad Public Policy. The National Forest should not be exploited for the Benefit of the wealthy few, at the expense of all. [Illegible] Preserve what little means of out old growth forest for the use and benefit of all Americans.

Sincerely,

Would you like to volunteer with TU Alaska to Help America's Salmon Forest?

Yes No
