Dear U.S. Forest Service:

The Roadless Rule has been instrumental in conserving the Tongass National Forest and in supporting its fish and wildlife-based industries for more than 20 years. ***Please uphold the Rule's protections for important fish and wildlife areas, including the Tongass 77.*** [Text bolded for emphasis] Roadless areas are an important source of food, jobs, and income through commercial, subsistence, and recreational fishing. Salmon are part of Alaska's culture and we must protect them and their spawning streams. ***Please do not roll back roadless are protection for habitat that our irreplaceable fish and wildlife populations need to survive.*** [Text bolded for emphasis]

Customize your comment by listing reasons the Tongass is important to you or why you value Alaska Roadless areas: (ex: specific locations you recreate, activities you do, or why you value fish & wildlife) [Text italicized]

I came about our wilderness dearly working on Prince of Wales all [illegible], I noticed me affects of logging and roads on the wilderness. These areas an not fun to [illegible] at and a mess for humans and wildlife to walk through. The roads make it feel like I am not in true wilderness and I live in Alaska because of me great wilderness we have. Please do not roll back the protections.

Sincerely,

Would you like to volunteer with TU Alaska to Help America's Salmon Forest?

Yes No
