Comments: I see not real need for this project. How does it enhance the forest? Ultimately it will cause environmental degradation and cost the taxpayer a large sum of money. What are "temporary" roads. Who is going to pay for the rehab of those roads? It really sounds like the Forest Service created this project just to waste taxpayer money. It would be nice for the Forest Service to tell us why they are proposing this project. We have lost 30% of our migratory birds many of which need a large block of old growth forest to reproduce. This project would be a disaster for birds and any animals that use this hardwood forest. I am opposed to this project. Thank you
