Comments: The Chattahoochee National Forest is a very valuable economic resource for our area. Tourism, hiking, fishing, and most importantly as a source of a clean and reliable source of water in our state. I am opposed to Foothills Landscape Project 52509. This paradoxically named project would degrade or otherwise put at risk all the natural amenities that our region enjoys. I am appalled that the proposed "project" would deny any public input as it progresses. The wording is asking our communities to accept "a pig in a poke."
