Comments: The people should have more input into public lands decisions!

As a nation parks visitor and hiker this recent, December / January public comment period is too short AND the proposal is too vague and open ended - Foothills Landscape Project #52509. My "voter" is for the very least interventions on public lands as possible. Leave the forests to naturally maintain themselves...they have done fine without Forest Service "help" for 1,000s of years.

Thanks
