Comments: All matters should be up to the public and not by a tyrannical and snail pace moving department as this. It has taken them forever to do anything since tornados that destroyed Boggs creek area. All that was done was the road cleared and camping closed because of some sort of erosion problem that is a result of poor road maintenance and drainage not people camping. When the department has taken any section of the forest over it has restricted use of property for public and taken millions if not billions in commercial logging of a forest that is supposed to be protected by the government.

Please bring the articles for everyone to vote on and please elaborate on why these actions are neccesary.
