First name: Susan

Last name: Waite

Organization:

Title:

Comments: Please consider carefully the impact your plans will have on the plants and animals, all species in this area. It may appear vast to a human viewing the area but this vast area probably needs to remain as it is without further human interference in order to maintain the healthy, normal habitat that it is for so many native plants and animals. In doing so, we also help to protect a healthy habitat for humans who benefit with clean air, natural areas to visit, and a place of beauty to appreciate and be proud of.
