Comments: This proposed pipeline will contribute to more forest fires by 1) having to shut down their operating machinery during RED fire alerts because of possible sparks from the equipment; 2) the project's declaration that their line breaks (i.e., 50' to 75' off-limits corridors above the pipeline) will double as "fire breaks" apparently do not understand that fires jump fire breaks and fire lines making the corridors ineffective; and 3) since Oregon is in a drought, any extra use of Oregon's water that does not go to Oregon citizens, who own the water, would also add to more and hotter forest fires.
