Comments: I am writing in protest of your process for your proposed work in Chattahoochee National Forest. Your plan doesn't have enough detail so that we even know what you are planning to do, where. This is my National Forest and you may not put out this nebulous proposal, with a short comment period. I expect and demand to see a comprehensive EIS for these

developments. I understand that National Forests are managed for many interests. What I don't like is this incomplete proposal for a phenomenal amount of work that will take years to complete.

I demand that you complete a comprehensive EIS that addresses all aspects of your plan, with maps, timelines and various plans that I can comment on. With today's threats to biodiversity, I want to know what's planned for my Forest. Thank you.
