Title:

Comments: It breaks my heart to see a government action that is aimed at exacting irreversible damage towards areas that I frequently visit and love. These actions can and will have an environmental effect that would be detrimental to the most frequently visited outdoor attraction in Georgia. In addition to seeing a negative environmental effect, the human rights that are violated in not allowing public commentary if this resolution passed goes against constitutional rights. I sincerely believe that this is not in the people's best interest, the local environment's best interest, and the wildlife's best interest. The problems this project would cause far outweigh the benefits. Please, please do not destroy our forest and our local environment.
