Comments: Dear officials,

I'm writing in opposition to the foothills landscape project proposal. As a metro Atlanta resident and an avid user of public lands, including areas in the Chattahoochee National Forest, I am strictly opposed to programs that take these valuable areas away from the public for which they were intended and turn over their resources to private corporate entities who would exploit them. Atlanta is already suffering from land mismanagement issues such as pollution and erosion, which will require public funding and discomfort to remedy, not to mention the other environmental impacts such as climate change affected. I am also opposed to harming our wonderful recreational areas. Please cease this proposal.
