Comments: This project is unacceptable! If you intend to do this you need to propose a complete list of exactly where you will be logging, burning, and such. We have the right to know and speak out if a park/trail will be totally done away with. Asking for a blank check to do with as you like only works on private lands. Not ones belonging to the public. I stand opposed to this project based solely on the fact you do not have a detailed proposal delivered. If you put together one, I may change my viewpoint. We, the public, deserve to make an educated choice in regards to our public lands and you are not giving us this option. Once again, I stand opposed to the Foothills Landscape Project.
