Comments: This proposal is far to broad with no specifics or time lines. Where my wife and live backs up to the National Forest and I would want to know what might impact the neighborhood and my property. We also both work up on Brasstown Bald which is a USFS facility and need to be prepared to answer visitors questions. We do a lot of hiking too, both of us having thru-hiked the entire Appalachian Trail so I would be very concerned about trail reroutes. I would also want to know which areas would be logged and be assured that this is done in a reasonable and sustainable manner!
