Title:

Comments: Thunder Basin Grasslands are federally protected lands and all the wildlife are equally protected. Livestock are there as a non-protected species that are high destructive to the environment. moreover they are allowed with a pittance payment while I and all Americans pay taxes to support the land and its flora and fauna. The cattlemens associations do not supersede the American peoples desire to not harm, shoot, poison or otherwise harm the land and the wildlife on it, I am asking that you do not shoot, poison or otherwise kill wildlife to satisfy the livestock industry that does harm while wildlife benefits their environment.
