Comments: Supervisor Jarrett,

I'm writing to share my grave concerns about the Landscape Project. You well know that the current Forest Service land is honeycombed with roads and past logging projects that were done years ago but the scars and negative impact on streams and habitat have remained for years. Why as taxpayers would we not plant/harvest/log trees in areas of GA where they grow faster and the logging impact is less due to the topography?

I ask you as guardians of our forests, where's the limit on logging, roads, and herbicide? We just keep pushing to do more and more. Please honor your responsibility to protect Five Falls, Big Shoals, Grassy Mountain, Springer Mountain, and Thrifts Fern for our children and grandchildren. Roads are not needed in these areas.

In addition, it is also responsible to maintain the opportunity for community debate and input on USFS projects.

It's one of our democratic opportunities from which we all can learn and work together.
