Title:

Comments: stop killing prairie dogs on this national site owned by 328 million americans. and stop killing all the birds, snakes, foxes, deer, bear and all other animals that also need this site to live on. and stop logging the trees. and don't give out any more grazing permits. those robber baron cattle ranchers are really stealing from the people of this nation. they pay low low low rates that they can't get anywhere else in america for private land and then their cattle leave the land utterly destroyed. we are tired and sick of being taken advantage of by these robbers. they aren't helping america any. and we don't need all these cattle. what we need is what god put on this earth, the environmental diversity of animals and trees. not the trees that will make good lumber. we need nature because those trees are necessary for earth's health. we need to protect earth and our health, not just robber baron steals and crooks.
