Comments: I have hiked all around the world and I have to say we have some of the most beautiful woods right here in North Georgia. Between the abundance of the wildflowers and different varieties to mushrooms and ground cover we have an ever changing forest around the trails. I can't imagine losing this. We also have an abundance of water sources that flow near and across the trails. We truly have a special forest and I am grateful to live so close to it.

I hope the Forest Service will be an advocate to protect and preserve the beauty we already have while performing any necessary maintenance in this area.

These woods are loved by many.
