Title:

Comments: I do not have a long winded speech or facts. But I do not need them to know that you would be destroying the beautiful mountains that has been put in our care, also the wildlife that would be killed or displaced . Do not destroy what God had put in our charge. I said OUR not government's to do with what they choose. This is the people's inheritance and past they do not need to be changed or destroyed for the future.
