Title:

Comments: I'm frustrated and angered by this process. It is clearly intended to circumvent present and future input from constituents and citizens so that the foxes may run the henhouse indefinitely. I realize that my recreation as paddler, hiker, mountain biker is not your priority or problem; and I recognize Forest Circus's purpose is to put profit above preservation but clearcuts, herbicides, and over prescribing "prescribed burns," monocrop agriculture of nonnative trees for timber... and who knows what else is a foolhardy plan for mismanagement. This truly sickens me as an outdoor enthusiast and environmentalists but more so as a citizen and rational human being as this whole plan is a despicable offense to democracy and science.
