Comments: Please do not go through with the "Foothills Landscape Project," which is just a euphemism for mass destruction of a beautiful area. It is also egregious to go through with this without accepting public input!

Ultimately, the proposal gives the Forest Service free rein to implement potentially detrimental actions for decades to come. The worst aspect of the Foothills Landscape Project proposal is that it would strip the public's input on management decisions. As part of the project, the Forest Service will not make decisions about where logging, burning, and road building will occur until public participation opportunities guaranteed by law have passed.
