Data Submitted (UTC 11): 1/7/2020 7:36:24 PM
First name: Juniper
Last name: Russo
Organization: For Fox Sake Wildlife Rescue
Title: CWR
Comments: Wild lands are critical to the balance and stability of our ecosystem as well as our cultural identity as Americans. The majority of citizens favor- and are willing to financially support- the continued existence of lands managed as wilderness, as these benefit public health and create sanctuary spaces for America's wildlife. Privately owned and managed timberland is already meeting and exceeding our economic needs and there is little benefit to opening public lands for the same purpose.
