Comments: What the hell?

Those are the thoughts everybody and everything will have during this inconsiderate and hilariously ignorant project. I'm not going to unleash every stupid thought I have in regards to this project, but truly sit back and think to yourself:

Why am I going through with this idea?

Do the cons outweigh the pros?

How will this affect my friends' kids and grandkids if they live in this region?

We're human. This project will affect humans, animals, wildlife, vegetation, and the state's reputation. Sadly, for the worse.
