Comments: To whom it may concern ,

How long did it take to write the propositions that are in this project ? How many months, or years or planning went into it ? Shouldn't the public be offered something of a comparable timeframe to read, review, and question this project ? We all care deeply about how the forest is managed and although not everyone has the same training or knowledge as some FS employees do, does that make their opinion less worthy ? I would please ask for more time and more details , and more open discussion to be put into something that affects so many people and such a vast area of land.
