Title:
Comments: Hit the brakes on the Foothills Landscape Project before knowing WHERE all of these actions may occur. I have land in Gilmer County and am moving back there this year or a neighboring county as listed in this project. Please stop and let the public know where it will be.

Allow for 60,000 acres of commercial timber harvesting;
Conduct prescribed burning on 50,000 acres;
Apply herbicide across up to 74,500 acres (nearly HALF the entire project area!);
Reroute up to 111 miles of trails; and
Build an undisclosed amount of "temporary" roads.
